

RECOMMENDED MBP CROSSES FOR 2008

Suggested Cross

Recreates Family

Available In:

Adam x Eve

(juveniles – inbreds of C9 parents)

14.031

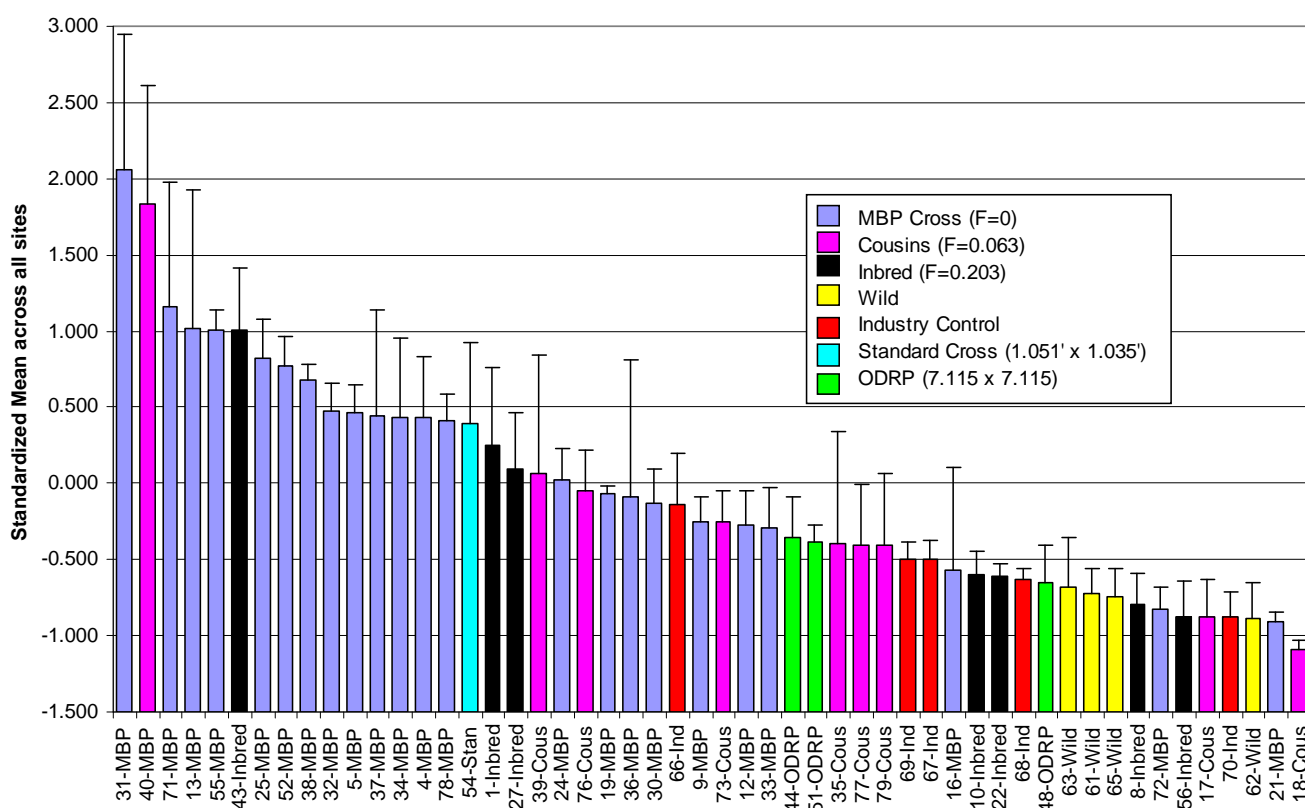

Netarts Bay

Yin x Yang

(juveniles – inbreds of C9 parents)

14.040

Netarts Bay

Average 3-site performance for all cohort 14 families. The standardized score is computed at each site and represents the deviation of each family's yield from the overall site average yield (in standard deviation units). The values computed at Totten Inlet, WA, Westcott Bay, WA, and Yaquina Bay, OR, are then averaged together to give the overall standardized score shown above. Error bars in the figure below represent the standard deviation among the standard scores at each of the three sites.
