

Summer Immersive Course: Ecology of Marine and Estuarine Birds

OSU
Oregon State
UNIVERSITY
Hatfield Marine
Science Center

Marine and estuarine birds are well adapted for life at or along the sea. In this course we will examine the morphology, physiology, foraging ecology, and biogeography of these species through lecture, field, and laboratory experiences. Come join us on the Oregon Coast this summer to learn how birds thrive in the ocean environment!

Course: FW331 (4 Credits)
Location: Newport, Oregon
Schedule: July 23 – August 18
Tues/Thurs 8:00 AM – 1:00 PM
Instructor: Dr. Don Lyons

Additional marine science courses available
In-state tuition for all students
Student housing scholarships available
