

Summer 2018

FW 493 Field Methods for Marine Research

CRN 72846/72847

Get transformative, hands-on experience in marine field methods. A small class size allows for flexible tailoring of topics providing real-world marketable skills. This course goes beyond basic theory and collection techniques, emphasizing small boat work and safety, animal handling, practical data methods, video sampling, and more to prepare students for future careers!
