FW 498/598 - Aquaculture Laboratory
3 Credits (Online portion Aug 19-23, Aug 26-Sept 6 @ HMSC MTWThF 8:30AM - 4:50PM)

Instructor: Dr. Chris Langdon & Dr. Matt Hawkyard, Department of Fisheries and Wildlife

Course Description
Learn about sustainable aquaculture! Aquaculture is one of the fastest growing global sources of food for a growing human population. Topics include oyster and fish reproduction, recirculating aquaculture systems, health management, hatchery techniques and conservation.

This course covers biology and culture requirements of fish, shellfish and algae. Emphasis on hatchery culture techniques and practical experience in handling finfish and shellfish.
