

## **December Safety Meeting Minutes**

### **12/06/06**

Members Present: Lori Parker (ODF&W) Randy Walker (HMSC) Alana Preble (HMSC) Faith Cole (EPA) Brian Parker (FRAM , NOAA) Ford Evans (HMSC)

There was discussion of the road in front of ODF&W being free from water during the November flooding of 06. This was the result of rebuilding the drainage system for that area by HMSC Facilities.

The accident that occurred in the Ed Wing when a person fell and received minor injuries was discussed. It was noted that the injury was caused by someone tripping over a boot brush. That boot brush has since been moved to a safer location.

Walker told about HMSC Facilities adopting a “Best Management Practice” for storm water runoff in the parking lots. Facilities is in the process of cleaning the storm water catch basins on campus and removing the sand and debris, installing filter media to catch petroleum waste products. In addition, the parking lots will be cleaned near the end of each summer.

It was agreed that in lieu of a January Safety Committee Meeting, there would be a Safety Walk through.
